

eNotifier™ Internet Reporting Module

eNotifier™ is the latest software offering from Accipiter Information Services, LLC. It is a web based reporting module that presents the user with a "wizard" interface that allows recording of incident report or claims using only a web browser. Need to get incident reports in fast and accurate? Need to gather underwriting information from clients? ***eNotifier™ can capture your data efficiently with little or no user training.***

Check out these features!

- A "wizard" type interface that will guide the user through the input process.
- On-line editing to ensure that the data is good and clean before it is submitted. Edits appear at page level so the user can see if there are any errors before moving to the next page instead of finding the error right before submission.
- Customer selected "drop down" lists.
- Automatic transmission to database for further consolidation and reporting.
- Automatic email notification of report submission.
- Custom interfaces to legacy applications available.
- Built in security system to keep out unauthorized users.

Enjoy these benefits!

- Get your valid report in a matter of minutes. No mailing delays or lost faxes.
- Entry from anywhere there is an Internet connection including PDA.
- Automatic consolidation of report data on database server from unlimited sources.
